

**Lesson 1**  
**Census 2000**  
**The State of the States Worksheet**

The 2000 Census revealed some important facts and trends. No state lost population. (The District of Columbia lost population, but is not considered a state.) The U.S. population has been shifting to the west and south since the early 1800's. This trend also continued between 1990 and 2000. To learn more about how the United States changed during the last decade, answer the following questions using [Table T1](#), "Resident Population of the United States."

1a. Name the five states that increased by the largest percentages (grew the fastest) between 1990 and 2000. Rank them in order (1 = state with largest percent change) and give the percentage by which they grew.
